## Stay ahead of regulatory changes

Join us for the February A la Carte Webinar, where Eunice Lee will present the latest developments in the FDA's Laboratory Developed Test (LDT) rule. This insightful session will cover key updates and implications for the industry, providing valuable information for laboratory professionals. Register now to stay informed and ahead of the curve!

## Meet the Speaker

### Eunice Lee

Vice President of Global Regulatory Affairs,  
Agilent Technologies

Eunice Lee currently serves as Vice President of Global Regulatory Affairs (GRA) at Agilent Technologies, Inc. GRA is responsible for developing risk-based regulatory strategies for the global product portfolio and ensuring compliance with in vitro diagnostics, chemical, biological, and environmental standards and regulations. Prior to joining Agilent, she was Vice President of Global Regulatory Affairs at Guardant Health, a precision medicine biotechnology company. Eunice was also previously at Merck, where she oversaw the regulatory team for companion diagnostics and in vitro diagnostics. Eunice's regulatory career began in the federal government, where she held roles of increasing responsibility at the FDA for nearly 8 years. Eunice earned a bachelor's degree in biology and physics from Bryn Mawr College and a PhD in biology from MIT. She also completed a postdoctoral fellowship at Stanford University.

*Please allow 1 week for CEU credit to be registered with NSH.*
